

Below is a list of reimbursements covered under the ZEM Polis basic healthcare insurance. You can also consult the list to see whether your excess applies and whether you are required to pay a personal contribution.

## Policy conditions

This is a summary of reimbursements for the most important types of care. Please consult the policy conditions for a full overview of all reimbursements and conditions.

## Claims and reimbursement of non-contracted care

The ZEM Policy is a combined insurance policy. In most cases, the care provider will submit the invoice directly to ZEM. If you receive care from a non-contracted care provider, other reimbursements apply. For further details, see Article 1.5.2, 'Level of reimbursement', of the policy conditions. A list of our contracted care providers can be consulted at [www.zem.nl/gecontracteerd](http://www.zem.nl/gecontracteerd).

Note: No rights may be derived from this reimbursement overview.

Type of care	Explanation	Excess	Statutory personal contribution
